# Our multifunctional systems work well under pressure.

A real advantage when it comes to productivity: Fast, reliable and with the same appealing quality, our new colour and b/w A3 multifunctional systems can master high print volumes. It goes without saying that you can adjust each system and extend it to include the additional options you need.

## Productivity is essential

The diverse functions of our colour and b/w multifunctional systems offer you great potential that meets professional quality standards. Take advantage of the opportunities to raise the quality of your deliverables and thus improve the productivity of your workflows. You will be amazed at how much you are able to save, thanks to efficient paper management, for example.

- ✱ Handle large print volumes, and achieve positive image effects: Create brochures, form letters, budget plans or exposés and presentations for business partners with front and back covers. You can use normal paper, for example, for internal purposes, or high-quality paper for external clients and business partners.
- ✱ Complete large volume work orders quickly and easily: Thanks to the high paper capacities of up to 7,650 pages from 8 paper feeds\* for up to 8 types of paper, you don't have to constantly refill the paper feed – an enormous relief.
- ✱ Speed up your production, meet your deadlines: High-speed outputs of up to 80 pages per minute in b/w (8055i), 70 pages per minute in colour (7505ci) and

100% duplex productivity ensure your documents are ready in the blink of an eye. Replace your toner cartridges during ongoing operations without having to interrupt the print job.

- ✱ Save time by not having to retype original documents, and avoid potential sources of errors by scanning colour and b/w documents. Our systems include the following standard functions: dual scan original feeder and the ability to create searchable PDFs using OCR recognition, because retyping can be tiresome.
- ✱ Smart and convenient: Adjust the display to the position that's best for you. The home menu can be configured to suit your needs, and the colour touch panel is intuitive and easy to use, just like a smartphone or tablet: zoom and swipe functions are the same for all systems.
- ✱ Always keep track of the big picture: The print jobs of different users will never get jumbled together thanks to three

output possibilities\* and the finisher with a multi tray, which includes seven output trays.

- ✱ Ease the network load, streamline your document management: You have everything at your fingertips in the mailbox of your own document area; processing the print data for repeat print jobs is no longer necessary.

**Quickly and professionally:**  
Work processes are done fast,  
reliable and hassle free.

\* optional

- ☀ Protect confidential information: If you use the 'Private printing' function, access codes in the printer driver prevent unauthorised access to your documents.

- ☀ Optimal cost transparency: The costs for printing and copying can be spread across up to 1,000 management codes (departments or projects).

## Innovation facilitates more efficient workflows

We are committed to your goals. In order to make your work processes more efficient and allow you to concentrate on your core activities, we have developed innovations to improve the productivity and output quality of our colour and b/w multifunctional systems. We are certain that you will profit from these innovations.

- ☀ Blank pages are not copied. Thanks to the new copying functions, the systems recognise blank pages and therefore don't copy them, which is a relief for large volume print jobs.
- ☀ Show the size: Print special formats up to A3+ as well as intermediate formats from the cassette, paper weights up to 300 g/m<sup>2</sup>, tab sheets and banner paper, and define up to 50 dividers per print job.

- ☀ You don't have to send large volumes of data via e-mail: You can compress PDF files when scanning and check the size of documents before sending.
- ☀ 'Send to Me': Log in and send important documents to your own e-mail address.
- ☀ 'Mobility guarantee' for when you're on the move: It's quick and easy to print and scan from mobile devices.
- ☀ Remain environmentally conscious: Reduce your energy consumption and work in a more environmentally friendly way with the 'Deep Sleep Mode'. Only activate the functions you need, when you need them.

Create banners in formats up to 330 x 1,219 mm.

Intuitive operation, just like a smartphone.

Visually appealing integration of the card reader\*.

- ← **Specialist in high print volumes:** Large-scale print products to meet professional standards, and consistently excellent quality page after page.

## Practical experience: tailored to your needs

Experience put into practice: Our multi-functional systems are based on your experience. That's why they can be optimally adapted to suit different needs and can be easily integrated into a smooth, professional work rhythm.

- ☀ Remain flexible: Configure your system to meet your needs, customised for your individual workflows, with software solutions\* via the HyPAS interface.
- ☀ For your successful presentation: Impress your customers and business partners. Use the finisher\* to create attractive, dispatch-ready handouts in

the form of brochures or exposés, for example. You no longer have to spend valuable time folding your business letters thanks to the tri-folding for letters\* – and in the blink of an eye, everything is ready for shipping!

- ☀ The individual software solutions for all aspects of your documents will make you tough to beat: Solutions are available to increase productivity and security standards and optimise scanning and archiving processes.
- ☀ You save time: Follow-Me-Printing solutions\* enable you to decide the time and the place, or in other words, when

and on which system you would like to access your print job.

- ☀ You define who can do what: Scalable security and accounting solutions\* determine user groups and the range of access options.
- ☀ Leave no traces: The Data Security Kit\* enables you to prevent data on the hard disk from being retrieved after use.

## For additional colour touches: 6505ci / 7505ci

Produce eye-catching documents. Optimise your communication with colour. You will be seen in a better light and make a lasting impression. Many industries cannot manage without colour print materials.

Numerous user groups want to profit from the positive effect of colour documents, as colour makes an impact.

- ☀ Realistic colour reproduction with impressive speed: The Fiery® Controller\* ensures nuanced fine-tuning of colours, for instance, to depict pictures and logos in high quality. Large colour files are processed and printed with high productivity.

Colour packs a punch thanks to the excellent initiative of our new colour multifunctional systems.

- ☀ Optimum colour levels: Use the intuitive tools of the multi-faceted printer driver.
- ☀ Invest in your corporate identity: Use different colour charts, adapt the colours of fonts, graphic elements and logos to suit your corporate design.
- ☀ Save money: Only use the colour printing function when you need it. Define which user groups should print in colour, for example, by using a card reader system\*.
